	K21U 4671
Reg. No. :	1, Explain about virtual memory
Name :	
V Semester B.C.A. Degree CBCS (20	SS (OBE) Regular Examination, November 2021 19 Admn. Only) Core Course OPERATING SYSTEMS —
Time: 3 Hours	RPIOSTRAGE CHESTON
Time . o riouis	Max. Marks: 40
	PART – A
(	Short Answer)
nswer all questions.	1988 to real particles and the fundamental section (6×1=6)
Define operating system	16. Explain FCFS and SJF scheduling with example
2. Expand PCB.	
3. What is the technique used to buffering.	support copy semantics for application I/O ?
4. List any two file attributes.	<ol> <li>Write note on later Process Communication (IP)</li> <li>Write note on later Process Communication (IP)</li> </ol>
5 is a mechanism th and the operating system.	at provides the inference between a process
6. Define external fragmentation.	
(2x5x10) the voice any six of the	PART – B
system.	Short Essay)
Answer any 6 questions.	of multipool A area made a soolbase (6×2=12)
7. Write short note on command in	
8. Explain process states with neat	
<ol><li>Write short note on contiguous n</li></ol>	
0. Explain the Look Disk Scheduling	a algorithm

P.T.O.

## K21U 4671

- 11. Explain about virtual memory.
- 12. Define maskable and non maskable interrupt.
- 13. Write short note on DMA.
- 14. Define spool. Explain spooling.

PART - C

(Essay)

Answer any 4 questions.

 $(4 \times 3 = 12)$ 

- 15. Explain the fundamental approaches for users to interface with operating system.
- 16. Explain FCFS and SJF scheduling with example.
- 17. Write note on segmentation.
- 18. Explain about file operations.
- 19. Write note on Inter Process Communication (IPC).
- 20. Explain the steps in DMA transfer with diagram.

PART - D

(Long Essay)

Answer any 2 questions.

(2×5=10)

- 21. Explain in detail about the functions of operating system.
- 22. Define Deadlock. Explain Bankers Algorithm for deadlock avoidance.
- 23. Explain any three page replacement methods with example.
- 24. Explain in detail about file allocation methods.
